

# SHUBDEEP LABS — ENTERPRISE AI BOT

## Complete Deep Architecture, Features & Capability Manual

Founder: Shubham Vernekar (+91 90288 33275) | Engine: Baileys + Google Gemini Multi-Key Rotation

### 1. DUAL-BRAIN SYSTEM ARCHITECTURE

Real-Time Context Switching

- **Client Coordinator Brain:** Warm, energetic, persuasive, high-EQ sales agent. Dynamically matches customer language (English, Marathi, Hindi, Hinglish) with natural emojis.
- **Executive Chief of Staff Brain:** Analytical, obedient, founder co-pilot in Self-Chat. Queries CRM, overrides pricing, creates agreements, and dispatches messages to clients.

### 2. 6-STAGE CUSTOMER SALES & CLOSING FUNNEL

End-to-End Automation

- **Stage 1: Warm Greeting & Discovery:** Welcomes first-time leads or returning customers warmly, acknowledges intent, and politely captures client's Name.
- **Stage 2: Project Scope Assessment:** Consults on E-Commerce stores, Gold live rate platforms, School ERPs, Portfolios, or Custom Web/Mobile apps.
- **Stage 3: Natural Ballpark Pricing:** Provides realistic estimates (e.g. ₹9,999 - ₹14,999) without robotic legal disclaimers and introduces Founder for roadmap confirmation.
- **Stage 4: UPI QR & Proposal PDF Dispatch:** Instantly sends official 50% Advance UPI QR code (9028833275@ybl) and generates official branded Proposal PDF with delivery timelines & full source code ownership.
- **Stage 5: Hosting & Maintenance Onboarding:** Proactively guides clients through the 4 official hosting tiers once development is confirmed.
- **Stage 6: Negotiation & Timeline Management:** Politely explains fixed hosting policies and routes express timeline requests (e.g., 'delivery by Saturday') directly to the founder.

### 3. OFFICIAL MONTHLY HOSTING & MAINTENANCE PLANS

Standardized Specifications

| Plan Name            | Price        | Included Features & Maintenance                                                                              | Recommended For        |
|----------------------|--------------|--------------------------------------------------------------------------------------------------------------|------------------------|
| 1. Essential Plan    | ₹449 / month | Domain, Hosting, Monthly Maintenance, Website Security (SSL + Firewall).                                     | Basic Web Pages        |
| 2. Advanced Plan     | ₹559 / month | Custom Domain, Hosting, Monthly Maintenance, More Security, + 1 Small Custom Change/mo.                      | Business Portals       |
| 3. Professional Plan | ₹669 / month | Custom Domain, Hosting, Special Maintenance, Special Security, + 2 Medium Changes/mo.                        | E-Commerce & Stores +P |
| 4. Ultimate Plan     | ₹779 / month | Custom Domain with Email, Hosting, Ultimate Monthly Maintenance, Ultimate Security, + 2 Ultimate Changes/mo. | Enterprise Web Apps    |

### 4. FOUNDER EXECUTIVE REMOTE CONTROL (SELF-CHAT)

WhatsApp Co-Pilot

- **Direct Client Relay:** Type 'Send her that price is fixed and cannot be changed' -> AI formats a polite message and sends it directly to the active client's WhatsApp.
- **Live CRM Intelligence:** Ask 'What is the status of Deepa?' or 'Who wants a gold website?' -> AI pulls full scope, quotation status, payments, and deadlines.
- **Quote & Agreement Override:** Type 'Quote Deepa 13000' or 'I got payment send agreement' -> Auto-compiles PDF and delivers directly.
- **Admin Fast Commands:** #stats (View lead counts), #pause (Pause bot in chat), #resume (Turn bot back on), #help (Directory).

5. SUPERCHARGED LONG-TERM MEMORY ENGINE

50-Turn Deep Context

- **50-Turn Persistent Context:** Maintains conversational memory over 50 back-and-forth turns, stored persistently on disk in chat\_history.json.
- **Structured CRM Memory Card:** Extracts and updates Client Name, Project Scope, Deal Status (INQUIRY / WON), Approved Budget, Hosting Plan, and Express Deadlines.
- **Dynamic Context Injection:** Injects the full Structured Memory Profile into Gemini on every turn so the AI never contradicts itself or re-asks questions.
- **Time-Gap Awareness:** Detects when a customer returns after days/weeks and warmly welcomes them back like an old friend.

6. REAL-TIME ALERTS & SMART DISPATCH ENGINE

Instant Notifications to Founder Phone

- **🔔 [HOT LEAD NOTIFICATION]:** Triggered when high-intent clients ask for price quotes, callbacks, urgent meetings, or proposals.
- **📉 [HOSTING DISCOUNT REQUEST]:** When a client requests discount or custom consideration on monthly hosting plans with full context.
- **✅ [DEAL CLOSED & PAYMENT CONFIRMED]:** When advance payment is received, detailing client email, project scope, and kickoff status.
- **⏸️ 3-Minute Anti-Spam Cooldown:** Prevents alert flooding during rapid typing, with automatic bypass if the client says 'Send him again' or 'Remind Shubham'.

7. MULTIMODAL INTELLIGENCE (VISION & VOICE AI)

Audio & Visual Processing

- **🗣️ Voice Notes Transcription:** Transcribes and analyzes incoming audio voice notes in Marathi, Hindi, and English, replying naturally in the same language.
- **🖼️ Vision UI & Wireframe Analysis:** Analyzes screenshots of competitor sites or handwritten UI sketches sent by clients to extract scope and feature lists.

8. ENTERPRISE DEFENSE & RELIABILITY ARCHITECTURE

High Availability & Security

- **Zero Echo Loops:** Tracks message key IDs (botSentMsgIds) and template signatures so the bot never processes its own outgoing alerts or replies.
- **Startup Backlog Discard:** Discards older historical messages received during initial connection sync so it never replies to old chats.
- **Status & Broadcast Filter:** Completely ignores WhatsApp Stories (status@broadcast), Channel Broadcasts (@newsletter), and Groups (@g.us).
- **Founder Typing Privacy:** When you manually chat with a client from your phone, the bot stays silent unless you use an explicit command.
- **Multi-Key API Rotation:** Rotates across 4+ Gemini API keys with multi-model fallback (gemini-2.5-flash-lite -> gemini-2.5-flash).
- **Deterministic Local Knowledge:** Answers pricing, hosting plans, portfolio links, and contact info locally even during complete API outages.
